DRIVE FREMODERN26

International Railway Modelers Meeting

Meeting place:

Sport Palace
Fraňa Kráľa 1/B
Pezinok
Slovakia

Only
15 km
from
Bratislava

What is the idea?

After a successful first FREMO meeting in Slovakia, in 2026 we would like to organize second meeting and create a tradition to organize the meeting bi-yearly. We would like to invite friends from other European countries to join us, create an international layout and enjoy a 5-day meeting together. Besides the main H0-RE layout, we would also like to build a linked H0e layout if there will be enough participants with H0e modules.

We plan to simulate the international and local traffic in epoch V and VI, starting in 90s and gradually renew the locomotives and trainsets to those currently in use. We will pay attention to the freight traffic, so the shunting yards and industrial areas are welcome. The layout should include an international main line from Hungary through Austria, Slovakia, the Czech Republic to Poland and eventually to Germany, with local branches. Other counties are also welcome to expand the layout. We would also like to include a station with a transshipment point to the narrow-gauge part of the layout.

Read about our 2024 meeting here:

First information

Accommodation: The accommodation will participants book by themselves. We are checking accommodation in the surrounding area to provide advice and support to participants. It is not possible to sleep in the hall. More information about accommodation will be provided later.

Meals: Food will be ordered in advance and will be delivered to the hall where we can eat together. More details about the food and also the subscription table will be provided later.

Additional information regarding the need for train sets, construction teams, layout, etc. will be shared with participants later.
